Firmware Upgrade Requirement
Warning: Read This Document

Please read the *Firmware* document carefully before trying to upgrade your filer to Data ONTAP 4.0 software. You must install NetApp F220 and F330 Firmware version 1.6 to run Data ONTAP Release 4.0.

New Features in Data ONTAP Release 4.3R4
Release 4.3R4 includes support for NetApp® Networking Software for Windows® version 2.0* and provides many new features that facilitate using the filer in a Windows environment. New features include:

- SecureShare™
- CIFS Oplocks*
- CIFS symbolic links*
- Netlogon*
- NetBIOS scope ids*
- PCNFS version 2
- WebNFS
- Password-protected web pages (HTTP)**
- Export by Subnets
- Gigabit Ethernet (F520/F540/F630)
- ATM support for the NetApp F630

Also, new features included previously in 4.2:

- Support for upgrade of the NetApp F220 and F330 to 9-GB drives
- DLT 7000 tape drive support
- Breece Hill Q2.15 Tape Library support

* requires a separate CIFS license. ** requires a separate HTTP license.
