

## **Promise Utility README (Pegasus R Series) V1.0**

Thank you for purchasing a Promise Pegasus RAID system. Driver software needed to communicate with Pegasus is built-in to Mac OS X 10.6.8 and later. To take full advantage of your Pegasus unit including monitoring the system, deletion and creation of volumes and setting up e-mail notification of issues, please install Promise Utility from the package on this volume. Promise Utility will auto-update over your internet connection when new versions are available.

For additional information on Pegasus, please visit <<http://www.promise.com/pegasus>>. To visit Promise's support website, please visit <<http://support.promise.com>>.
