1. Summary

This product bulletin announces the availability of a new Expansion Kits Cable Kits configuration program in the Add Parts product search section of the Quote Tool. This program consolidates cables and selected kits into a central depository, making for a simpler and faster quoting process for cables and connectors.

2. What's New?

This is a new configuration program in the Quote Tool Add Parts product search section called "Expansion Kits Cable Kits." Initial parts being made available are the main optical and copper cables used for connecting FAS system shelves and switches; along with cluster interconnect cables and main internal cabinet power cords. In addition, a separate tab is available for additional kits to be added as they are defined as a means to make ordering of add-on cables, rail kits, and connectors much simpler and faster. The first kit available using the Expansion Kits Cable Kits program is a shelf expansion kit containing cables, universal rail kit, and power cords typically required for field upgrades. Future kits will be added to this program as requirements are defined.

For clarity, a mouse-over in the UI provides additional content definition and quantity information. The following figures show examples of the UIs.

UI examples:

Figure 1) Shelf expansion kit.

Figure 2) Cable headers and cable description (part number) with mouse-over message.

Quoting

The Expansion Kits Cable Kits configuration program is accessed from the Add Parts tab on the Net Price Solver page in the Quote Tool. Simply select a product from the Find drop-down list and type Expansion* or *Cables to initiate the search. Follow the standard procedures for edit configuration to launch the configuration program. Selections of cables or kits with quantities can then be completed.

Product Availability

Availability of the new Expansion Kits Cable Kits configuration program begins with the May 4, 2009, Quote Tool release.

4. Regulatory Compliance

Products need to be validated against the NetApp Safety/EMI Regulatory Compliance List prior to order submission. The list is available at PartnerCenter Compliance Information. This is required to make sure that products are being sold only in the countries in which NetApp has received regulatory compliance certification.

5. Warranty and Service

The parts in this new configuration program are fully supported through NetApp SupportEdge and ConsultingEdge services. Please check [NetApp Global Services](#) for details about how the NetApp Global Services team can help.
