1. Summary

This product bulletin announces the availability of new SnapVault® capability in Data ONTAP® 7.3.

SnapVault is Data ONTAP data protection software that backs up selected Data ONTAP Snapshot™ copies to another NetApp system or controller. It combines Snapshot space savings with block-level incremental transfers to provide a cost-effective D2D backup solution with superior backup reliability, recoverability, and total cost of ownership (TCO) vs. tape-based backups.

Price discounts are also included when SnapVault Primary and SnapVault Secondary are quoted on the same storage controller.

2. What's New?

SnapVault in Data ONTAP 7.3 includes the ability to have a SnapVault Primary and SnapVault Secondary running on the same controller. What this means is that you can install a SnapVault Primary license and a SnapVault Secondary license on the same controller. This can be used for vaulting between different disks in the same controller. Another type of configuration that is enabled by this new functionality includes bidirectional backup between two different controllers.

One useful application for this feature is to use SnapVault between a set of FC disks and with SATA disks. Customers are then able to vault Snapshot copies from expensive FC disks to inexpensive SATA disk drives within the same system.

To avoid sales inhibitors special pricing will be provided when purchasing SnapVault Primary and Secondary licenses on the same controller. The price of the combination of the two licenses will be the same as the price of the SnapVault Secondary license. In effect, the SnapVault Primary licenses add no additional cost when purchased with SnapVault Secondary. When configuring both of the software licenses on a single system in the Quote Tool, a special set of new parts will be generated on the quote to represent the new prices. Bundled software licenses are also included as long as both software licenses are ordered. An example would be ordering the SnapVault and SnapMirror® HA bundle and SnapVault Primary on the same controller.

3. Sales Tools (Sales Guides, Training Presentations, SE Presentations)

N/A

4. Customer-Ready Tools (Customer Presentations, Datasheets)

N/A

5. System Requirements

- SnapVault is supported in Data ONTAP versions 6.2 and later.
- Data ONTAP 7.3 is required in order to use the new SnapVault capabilities described in this bulletin.
- Platform support: For any particular Data ONTAP release, SnapVault is supported on all platforms supported by that release.

6. Product Information

There are two types of licenses needed for a SnapVault deployment:

- SnapVault Primary for the systems that are being backed up
- SnapVault Secondary for the systems that are the backup destinations

Note: Both licenses are required on systems that are used as both backup sources and destinations.

On FAS and V-Series systems, SnapVault Primary and SnapVault Secondary are licensed on a per-system basis. On NearStore® systems, SnapVault Primary and SnapVault Secondary use capacity-based licensing.

The SnapVault part numbers and prices are included in the NetApp published price list and the May 2008 Quote Tool release. Partners should contact their channel representative for pricing information.

The table below lists the part numbers for various configurations as of the date of this product bulletin.

Software Subscription Plans

It is highly recommended that customers purchase an SSP license for SnapVault via SupportEdge Services. This will entitle them to NetApp customer support and also future releases of SnapVault.

Quoting

Standard quoting rules apply.

Downloading

For downloading software, go to [NOW™ Download Software](#).

Product Availability

The ability to quote SnapVault Primary and SnapVault Secondary software on the same controller will be effective with the May 2008 release of the Quote Tool.

7. Regulatory Compliance

Products need to be validated against the NetApp Safety/EMI Regulatory Compliance List prior to order submission. This is required to ensure that products are being sold only in the countries in which NetApp has received regulatory compliance certification.

8. Warranty and Service

Standard software warranty and services apply.

9. Additional Information

Contact information: Please contact your NetApp sales or channel partner representative with questions concerning this bulletin.
