* Additional software can be added via individual software packs. Go to [FAS2000 Series](#) in SalesEdge for details about software packs.

** These replace existing NetApp Select™ FAS2020 bundles.

Highlights for the FAS2000 series: High-capacity, low-cost SATA drives internal to the base controller system; increased total system storage scalability that enables better deployment flexibility for our customers. The FAS2020 is a scalable, real-estate-efficient, value-based system that can be deployed in a variety of IT environments as both SAN (iSCSI and FC) and NAS storage.

3. Sales Tools (Sales Guides, Training Presentations, SE Presentations)
