1. Summary

This product bulletin announces new NetApp Select™ bundles for the FAS3160 and the V3100 series; a new SharePoint®/DR bundle; a new bundle for disk-to-disk (D2D) backup of primary systems; and other bundle updates and enhancements.

NetApp Select bundles are available exclusively to NetApp channel partners, and deliver the following key benefits:

- Best pricing: NetApp Select provides the best list price for a given solution.
- Ease of ordering: Configuring a FAS system is easy when you follow the NetApp Select symbol through the configuration process.
- Exclusive application solution software bundles: NetApp Select offers special application solution software bundles so that the software required for a specific application is available at the best price.

All NetApp Select bundles are available worldwide.

2. What's New?

The family of NetApp Select bundles is being enhanced with the following additions:

Base system bundles for new FAS3160

NetApp Select bundles are available for all FAS31xx systems, including the new FAS3160. For each system, base bundle configurations are available for dual-controller configurations with iSCSI and the following protocol options: FCP, CIFS, NFS, and CIFS+NFS. As with other FAS3000 bundles, these bundles can be combined with add-on software bundles for specific solutions and applications, and can also be extended to include a la carte options such as protocols, storage, software, and services.

Introduction of NetApp Select bundles for V31xx

NetApp Select bundles are now available for all V31xx systems. For each system, base bundle configurations are available for dual-controller configurations with iSCSI and the following protocol options: FCP, CIFS, NFS, and CIFS+NFS. As with the FAS31xx bundles, these bundles can be combined with add-on software bundles for specific solutions and applications, and can also be extended to include a la carte options such as protocols, storage, software, and services.

New bundle: Application Disaster Recovery for SharePoint

The new Application Disaster Recovery bundle for SharePoint provides easy, cost-effective replication of SharePoint data, and includes SnapMirror®, SnapDrive® for Windows®, SnapManager® for SQL Server™, and SnapManager for SharePoint.

Updated disk-to-disk backup bundles for secondary systems

Previous D2D backup bundles have been enhanced to include deduplication software, and have been renamed as "D2D Backup (Secondary System)" bundles, highlighting the fact that these bundles are for secondary/target systems.

New bundle: D2D Backup for Primary Systems

The new D2D backup bundles for primary systems consist of SnapVault® Primary and enable data from NetApp primary systems to be backed up to disk on NetApp secondary systems. D2D backup bundles are available for base system configurations as well as for the application solutions Microsoft® Exchange, SQL Server, Oracle®, SAP®, and SharePoint.

FAS2000 NetApp Select bundles with the new 450GB SAS disk drive

With the new 450GB SAS disk drive, two new bundles are available for the FAS2020 (6- and 12-disk configurations) and the FAS2050 (12- and 20-disk configurations).

Enhancements to Backup & Recovery bundle for Virtualized Infrastructure

The Backup & Recovery bundle for Virtualized Infrastructure has been enhanced and now includes deduplication software.

3. Sales Tools (Sales Guides, Training Presentations)

For additional NetApp Select information and resources, refer to NetApp Select on PartnerCenter.

4. Customer-Ready Tools (Customer Presentations, Datasheets)

For additional NetApp Select information and resources, refer to NetApp Select on PartnerCenter.

5. System Requirements

Refer to the NOW™ (NetApp on the Web) site to access and order product documentation:<http://now.netapp.com/NOW/knowledge/docs/docs.cgi>.

6. Product Information

New and modified bundles are listed below. For a full listing of all currently available NetApp Select bundles, see the NetApp Select Bundles Catalog.

Disk-to-Disk Backup, Primary System

The Disk-to-Disk Backup (Primary System) bundles consist of SnapVault Primary software, with the option to add FlexClone at a special discounted price.

D2D backup bundles are available for base system configurations as well as for the application solutions Exchange, SQL Server, Oracle, SAP, and SharePoint. To generate a quote for D2D application solutions, select D2D Backup (Primary System) in the Quote Tool and specify the desired application. On the quote sheet, the configuration will be shown as a combination of the D2D Backup (Primary System) bundle and the desired application-specific Backup & Recovery bundle.

Quoting

For detailed instructions on how to quote this product or service using the Quote Tool, see **QTB-PRODUCT**.

Downloading

For downloading software go to [NOW Download Software](#).

Product Availability

The FAS/V3100 NetApp Select bundles will be available to quote in the November 2008 release of the Quote Tool.

The FAS/V3100 NetApp Select bundles are scheduled to be production released for shipment in November 2008.

The Disaster Recovery bundles for SharePoint will be available to quote with the December 2008 release of the Quote Tool.

7. Regulatory Compliance

Products need to be validated against the NetApp Safety/EMI Regulatory Compliance List prior to order submission. The list is available at **PartnerCenter Compliance Information**. This is required to ensure that products are being sold only in the countries in which NetApp has received regulatory compliance certification.

8. Warranty and Service

These bundles are fully supported through NetApp SupportEdge and ConsultingEdge services. Please check

[NetApp Global Services](#) for details about how the NetApp Global Services team can help.

9. Additional Information

Contact Information: Please contact your NetApp sales or channel partner representative with questions concerning this bulletin.
