GLOBAL SERVICES

DATA ONTAP® GX IMPLEMENTATION SERVICE

Shorten the time to scalable performance and capacity, while minimizing risk, with implementation services for high-performance-computing NFS environments.

THE CHALLENGE

Linux and UNIX compute clusters running high-performance-computing (HPC) applications put high demands on the storage environment. Performance requirements are typically in the multi-gigabyte-per-second range, and capacity requirements can scale to multiple petabytes. In order to meet these requirements, you need to be able to move data between systems and tiers of storage seamlessly and easily.

NetApp Data ONTAP® GX implements a flexible, high-performance storage architecture that scales to hundreds of storage servers and petabytes of capacity in a single, distributed cluster, providing breakthrough performance, management simplicity, and reliability. Given the power and flexibility of GX architecture, how can you rest assured that your GX storage system is configured to your environment's unique specifications?

THE SOLUTION: DATA ONTAP GX IMPLEMENTATION SERVICE FROM NETAPP

To ensure that your GX storage solution is customized to your specific application and workflow requirements, NetApp offers – and highly recommends – NetApp Data ONTAP GX Implementation Service.

Expert NetApp Professional Services personnel will deliver a comprehensive implementation service that will:

- Free your internal resources to focus on managing the day-to-day operations of your business.
- Minimize risk by leveraging the experience of NetApp Professional Services personnel.
- Increase time to scalable performance and capacity by ensuring your system is customized to your meet your application and workflow requirements.

APPROACH

NetApp Data ONTAP® GX Implementation Service tailors your HPC storage solution for your environment, and includes:

- In-depth orientation that provides a detailed overview of the nomenclature, concepts, and Data ONTAP GX feature set.
- Advanced configuration that customizes the GX system configuration – including vServers, mirrors, export rules, schedules, policies, and event notifications – for the specific application and workflow.
- Testing that verifies the system operates correctly and to specifications.

PRICING

Data ONTAP GX Implementation Service is a fixed-scope, fixed-price service with specific deliverables, clearly defined in the Service Brief. For further information, please contact your local Network Appliance account representative.

COMPLETE NETAPP SOLUTION

NetApp offers a complete solution for high-performance computing storage requirements. The Data ONTAP GX Solution offers you the hardware, software and service components required to meet challenging HPC demands.

ADDITIONAL RELATED SERVICES

NetApp Global Services can assist you in any and every phase of the storage lifecycle. Whether you need help planning your next-generation storage system, need an extra set of hands for a major storage deployment, or want to optimize your existing infrastructure, trained NetApp services personnel have the skills to help you start it right and keep it right. NetApp offers a complete portfolio of related services, including Data ONTAP GX Installation and support services. [To learn more, go to http://www.netapp.com/](http://www.netapp.com/)

ABOUT NETWORK APPLIANCE

Network Appliance is a world leader in unified storage solutions for today's data-intensive enterprise. Since its inception in 1992, Network Appliance has delivered technology, product, and partner firsts.
