1 Version

This release notes describes release details, and known issues that apply to NetApp Data Center Planner (NDCP) version 0.6.0.

1.1 Release details

The release details for NDCP are given below:

- Version: 0.6.0
- Platforms supported: Windows® (XP, Windows 7)

1.2 Known issues

The known issues for this release of NDCP are listed below:

- Exporting parsed component details to .xls format will fail if the number of rows being exported are greater than 65,536.
- The performance of Parser is dependent on the physical memory available in the machine. When a large number of files are loaded (file being loaded is huge), or there are large number of components to export, there will be some performance degradation and the GUI may appear unresponsive.
- When an nSANity file loaded in the Viewer (or Parser) has any validation errors, the Viewer (or Parser) attempts to load as much data as possible. In such cases the number of nSANity components whose details are displayed might be fewer than the actual components present in the file.

1.3 Support

- For any NDCP related queries and support issues, mail to xdl-migration-tools-issues@netapp.com
- In case of any feedback, mail to xdl-migration-tools-feedback@netapp.com
