

Faster MySQL Database Development and Administration

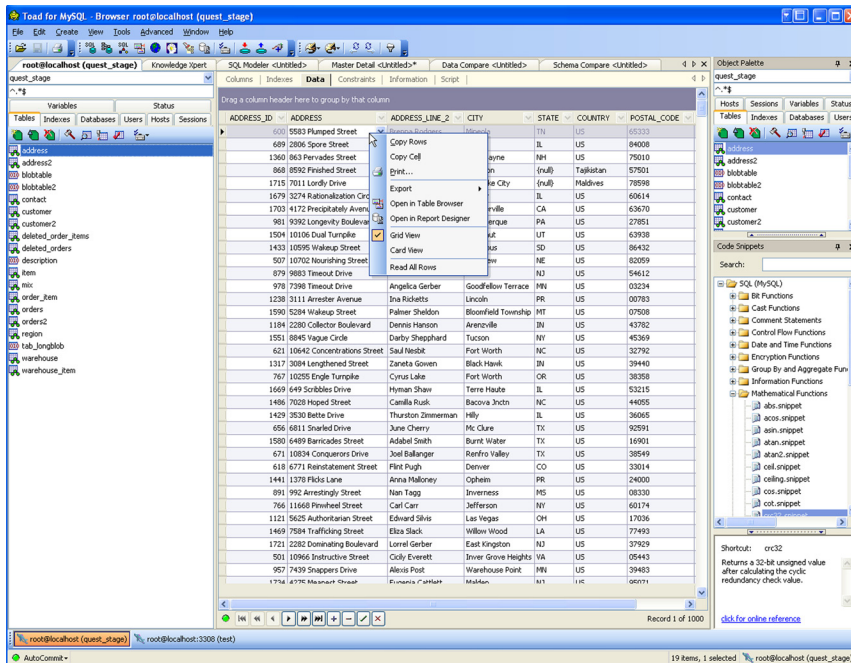

With growing demands from customers and end users, you're being asked to meet deadlines with increased speed. Whether it's a simple web site or an enterprise-class application, you must quickly create queries, manage database objects and develop and review application code, regardless of your skill level. In addition, you have to uncover and solve issues quickly and efficiently.

Toad® for MySQL is a database development and administration solution that enables you to rapidly create and execute queries, automate database object management and develop SQL code, while providing instant access to MySQL expertise.

With Toad for MySQL, you have access to a community of users, peers and experts to help solve development and administration issues, and assist in developing applications. You can also provide feedback to us on product improvements.

BENEFITS

- Quickly create, modify, execute and save queries
- Effortlessly format the layout of code, including inserting headers, adding or removing extra lines and changing the case for keywords
- Simply save extracted data from the database to different formats
- Quickly view, create, modify and manage database objects
- Easily obtain instant access to MySQL expertise, answering 70 percent to 80 percent of development and administration questions

Graphical user interface for MySQL development and administration.

A Powerful SQL Editor

Toad for MySQL makes the task of editing SQL effortless. Features include:

- **Macro Record/Playback** — Record a series of keyboard commands in the editor that can be played back multiple times, reducing manual effort
- **Find and Replace** — Save time by performing a find-and-replace across multiple files found in a directory structure
- **Configurable Code Formatting** — Modify the layout of SQL code in the editor
- **Code Snippets** — Use drag-and-drop functionality for frequently used SQL functions
- **Shortcut Keys** — Perform frequently used actions faster than ever before
- **Auto Completion** — Complete databases, tables and columns automatically when entered

Data Grids

Toad for MySQL displays the output of data in ways that are easy to understand, configure and output to different file formats. The data output can be viewed in either a grid or card view format for summary information at a glance. Output can be configured by sorting, grouping, filtering and moving columns without re-executing the query. Either entire data queried or selected data in a grid can be outputted to multiple formats, including: Excel, Fixed Column Width, Delimited Text, XML Schema, XML Data, HTML Table or Insert Statements.

Database Browser

The Database Browser lets you view database objects across multiple databases or servers. Objects such as tables, indexes, views, users, hosts, sessions, procedures and functions can be quickly viewed and managed through drill-down options. The Database Browser simplifies sifting through hierarchical mountains to find the correct data. With a single click, it further facilitates the comparison of objects of the same type.

About Quest Software, Inc.

Quest simplifies and reduces the cost of managing IT for more than 100,000 customers worldwide. Our innovative solutions make solving the toughest IT management problems easier, enabling customers to save time and money across physical, virtual and cloud environments. For more information about Quest go to www.quest.com.

SYSTEM REQUIREMENTS

Minimum Hardware Requirements:

- IBM style PC
- 44 MB of disk space for installation
- 256 MB of RAM minimum, 512 MB recommended
- VGA monitor with a resolution of at least 800 x 600 is required, and a resolution of 1024 x 768 is recommended
- Mouse pointing device

Minimum Software Requirements:

- Microsoft Windows 2000 and XP Professional client
- Microsoft .NET Framework version 2.0
- Internet Explorer 5.01 or later
- MDAC 2.6 or later
- Client connectivity and configuration for each database (prerequisite for connecting)

Supported Databases:

- MySQL® Network™ version: 4.1.18, 5.0.19
- MySQL® Pro™ versions: 4.1.18, 5.0.19
- MySQL® Classic™ versions: 4.1.18, 5.0.19
